Objectives

- Oracle E-Business Suite (OEBS) administrator
- Senior programmer, Software architect
- OEBS consultant, Software integration specialist

Main competence areas

Administration

Oracle E-Business Suite (OEBS) – 4 years experience.

Oracle DB - 8 years,

Linux, Windows Server 2003 – 10 years,

Oracle Enterprise Manager Grid Control – 2 years

Oracle Apex – lesser then year

Oracle BI – lesser then year

Programming

Delphi, PL/SQL, SQL – more than 10 years

C++ - 3 years

Java 2 EE – less than a year

Business Intelligence (BI)

Qlick View

Work Experience

12. 2003 – present - large real estate Development Company.

Position: Senior developer, head of small group of programmers and analysts

Responsibilities:

OEBS platform administration.

(Install, configure, backup, patch, diagnose, solve problems, performance tuning, metalink use, rise Service Request)

1 production instance OEBS 11i, DB 9.2, RedHat EL 4

1 test instance OEBS 11i, DB 9.2, RedHat EL 4 (production clone)

1 test instance OEBS 12i, DB 10.2

OEBS administration (internal).

User accounts management, HR – working with personal information and building department and position hierarchy, Payables – full invoice creation approve and payment process configuration, forms personalization, user and system profiles, flexfield configuration, GL - account segments configuration, new responsibilities creation, function registration, folder administration. Oracle Workflow creating and modifying workflow processes, notifications, functions, attributes and other necessary workflow – administration skills.

Data Base (DB) Administration

(Install, configure, backup, patch, diagnose, performance tuning)

Corporate DB server DB 9.2 Windows Server 2003

Test and service server - Some DB 9.2 Windows Server 2003

Test server DB 11.1 RedHat EL 5

Administration of Oracle Enterprise Manager 10g, 11g Grid Control

(Install, configure, backup, patch, all working servers registration, installation of intelligent agents, jobs planning, Server's health monitoring, mailing notifications and warnings)

Administration of Oracle Apex 4.0.1

Stand – alone installation of Apex + oc4j + Database. Installation of DB (11g), creating repository, installing and configuring oc4j, installing Apex, configuring workspace. Managing users, configuring HTTPS connection.

Administration of Oracle BI (Business Intelligence) 11.1.1.3

Creating repository using RCU. Installing full pack of Oracle BI. Creating users. Managing data sources.

Work coordination of small group of Oracle – programmers and analysts.

Setting rules and regulations for common programming process. Revising and checking related technical documentation. Work process coordination. Design of system architecture (software and data structures). Writing requirements specification.

Programming using Delphi + PL/SQL + SQL

Writing various Delphi programs for working with corporate DB. They were stand-alone and OEBS – related. I have a deep knowledge of OEBS 11i internal structure, and of main concepts of writing extensions for it.

Some noteworthy examples:

- Call Center + Statistics and common usage of CRM information. Program was integrated with professional telephone system - OkTell CallCenter.
- Registration and storage of agreements program.
- Program for real – time finance monitoring and transaction planning – OEBS related.

Java 2 EE programming

Code revision in OEBS extensions.

Business Intelligence in Qlick View

Writing data load scripts, creating reports, writing analytic functions for CRM and OEBS

2001 – 2003 – scientific research institute “precision instruments”

Position: second - category programmer

Responsibilities:

Programming with C++ (Linux), WX Windows, DB PostgreSQL.

Created program complex for working with geographic spatial information. For storing and manipulating data was used PostgreSQL geo spatial data module for vector maps. I created DB – structure and modules for search, import and export of data.

Created program complex for working with space geo photo information. Huge image stream processing (> 8 Gb) . Refining images – exposition, contrast, noise correction. Export in tiff.

Wrote program for “imitator” controller control. Controller produced the stream of data that imitated the stream from satellite.

2001 – 2003 – Starlight (flower distributor company). Project of the program complex creation for full automation of flower business. (Invoice, transportation, logistic, sell, cash)

Responsibilities:

Creating database structures Oracle 9.1, Delphi programming, Oracle administration, backup, data import.

I was involved in creation of program complex that provides support of full circle of business tasks in flower business. Created invoice module, rights management system, terminal usage module. Also was responsible for DB administration, software update and modification.

1998-2001 – Several projects on Delphi + Interbase (Firebird)

Education

1996-2001 г.г. – Moscow state Aviation Institute (MAI). 3-d faculty – «Control and navigation systems of flight vehicles». Chair 308 – «Information technologies»

Additional education

Oracle DBA Fundamentals I – Completion certificate 2005

Oracle DBA Fundamentals II – Completion certificate 2005

11i Install, Patch and Maintain Oracle Applications – Completion certificate 2005

Oracle 10g: Java Programming – Completion certificate 2007

Oracle 10g: Build J2EE Applications – Completion certificate 2007

Foreign languages

English language courses BKC (3 levels) – Completion certificate, Upper Intermediate level.

Personal information

Marital status: Married, have no children.

Personal skills: steady, punctual, sociable, active, self-dependent.

Hobbies: photography, play football, volleyball, tennis, swimming, carting, play paintball.
